NetHealth360 | Professional Services

Review expert analysis of all WoundExpert features, configurations, and workflows employed by your facility.

Assess opportunities for improved documentation and operational efficiencies within your system.

Capture a score card and report highlighting specific opportunities for improvement and relevant value drivers.

This service is offered to existing WoundExpert clients.

The WoundExpert® HealthCheck is an annual opportunity to take a step back, examine your metrics, and re-tool the way your team drives documentation to compliance, revenue, and efficiency through the use of WoundExpert.

Three phases of analysis ultimately provide you with high-level findings for WoundExpert optimization.

Phase 1 | Overview

- » Review scheduler, front desk and clinical workflows, and provider workflows
- » Review documentation endpoints for best practices (based on your quality initiatives like MU or PQRS)
- » Review report dashboard configuration

Phase 2 | Process

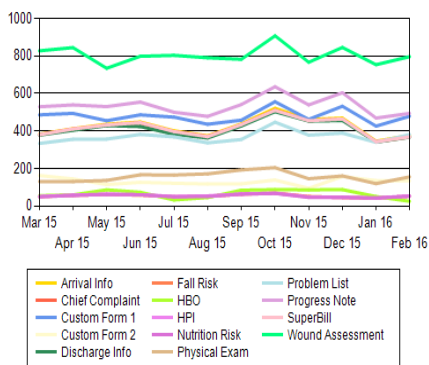

- » A one-hour conference call launches the process
- » Discuss department and facility history as well as operational and documentation workflows

Phase 3 | Report + Scorecard

- » A two-hour conference call reviews findings and next steps
- » Your current WoundExpert functionality is scored
- » Your report details opportunities to more fully use WoundExpert and reach desired performance goals
