

Bump up your game.

Employee Health and Occupational Medicine can cruise along just being compliant, or you can take control of the action and see real bottom line results.

The Net Health 360 Professional Services team examines your work, requirements, and resources to ensure your programs meet all your needs—the basic, the complex, and even the visionary. In an arena that spans surveillance to workers' compensation, ensure your solutions are driving satisfied employees, complete compliance, and impressing management.

The Net Health 360 Professional Services team brings analysis and best practices that drive employee oversight solutions to optimal results.

Learn to understand your programs' effectiveness at-a-glance.

Continue driving down costs by eliminating paper charts and storage, once and for all.

Optimize processes around scheduling and visits to reduce wait times and cancellations.

Boost staff and stakeholder satisfaction by maximizing the use of secure data and documentation sharing tools to improve productivity.

Choose from two core service packages designed to pinpoint gaps in compliance or effectiveness, boost productivity, and retool your Employee Health and Occupational Medicine programs. Or, select critical areas that need attention and we'll accommodate that as a custom offering.

Workflow Optimization - Onsite + remote work

- Business Process Review and walk-through (*operations, registration, scheduling, missed appointments, exposures and vaccines, provider and clinician documentation, case management*)
