

You're not afraid of a little competition.

Your Outpatient Rehab Therapy program competes in a busy arena of hospital services. Why not let proven performance bump up your profile a bit?

Net Health 360 Professional Services experts size-up service line and financial performance, patient outcomes, growth strategies, and competitive analysis. Get ready to take charge of your arena.

As Outpatient Director, become "CEO" of your therapy service lines.

Speed-to-benefit comes from integrated best practices and strategic oversight that maximizes your therapy assets, facility performance, and market growth.

Program analysis and interviews are executed in a combined on-site and remote package.

Your key players include Dir. Outpatient Rehab, Front Office, Finance, Marketing, and Strategic Planning teams.

Net Health 360 professional services programs are designed to conquer the most complex problems in specialized lines of work.

Our Rehab Therapy offerings will refine your operational road map and define strategies to highlight your relevance in the competitive landscape.

Track 1: Performance Assessment & Implementation Overview

- Explore the overall health of your program
- Define specific opportunities for improvements that will drive performance metrics
- Assess action plans to manage cancellations and no-shows
- Examine therapist productivity metrics and goals
- Assess your ability to scale and preparation for new business volume

Track 2: Strategic Growth Plan & Competitor Analysis Overview

- Determine how to become the clear choice for outpatient rehabilitation services in your region
- Build a deliberate strategy and execution plan to stay relevant in the market
- Stay true to your clinical best practices while positioning your operational processes to be poised for growth
- Program work examines competitive landscape, volume trends, economic opportunity, and delivers an operational marketing plan to execute
