

Helping you maintain strong relationships with your patients.

The **ReDoc® Patient Portal** provides a secure line of communication between you and your patients. Conduct virtual visits and have follow-up conversations with your patients via secure messaging when it's convenient for you. Patients have 24/7 secure, on-demand access to their therapy health information without phone calls and voicemail messages.

Videoconferencing for Telehealth*

- Interact with your patients in real-time over a HIPAA-compliant video connection
- Maintain regular communication and therapeutic rapport with your patients
- Provide access to care for patients with travel limitations

Secure Messaging

- Respond to non-urgent questions from patients
- Initiate patient engagement to promote follow through with their care plan
- Receive patient communications on medications, physician appointments, and other updates at the patient's convenience

Share Documents and Photos

- Utilize attachments such as documents and photos; gain clinical insight and offer recommendations to enhance the patient experience
- Give patients access to documents and photos in their health record, or send patients attachments in secure messages

View Health Information and Appointments

- Provide patients with 24/7 access to their health information, including discharge instructions, home exercise programs, and educational materials
- Allow patients to designate an authorized representative to view the patient's health records (spouse, parent, adult child, etc.)
- Enable patients to view previous and upcoming appointments

* The Patient Portal is included with your ReDoc license. However, videoconferencing is available for a fee.

Please contact your Net Health sales representative for additional information.
