

Business Intelligence

A tool designed to support better decision making based on data analytics/metrics that have been gathered in a data warehouse/data mart.

Easy to use dashboard tool that provides visual access to robust data metrics so you gain:

- **Access** to key metrics for specific roles
- **Insights** through real-time data, allowing immediate, corrective action
- **Improvements** in overall performance and outcomes

How the Optima Business Intelligence Tool Helps

Analyze your business trends graphically and at-a-glance

- Drill-down to get a granular look at specific performance metrics across or within sites
- Drive decisions by transforming data into real-time, meaningful information
- Eliminate wasted time running and compiling multiple reports to get the data you need to run your business
