

Helping you maintain strong relationships with your patients and employers.

Provide your patients with the care they need, regardless of their location.

Agility® provides a secure line of communication between you and your patients, in partnership with Updox.* Conduct virtual visits with secure videoconferencing in Updox, while documenting the visits in Agility as usual. Initiate conversations with patients via secure text messaging. Expand your options for providing patient care and increasing patient engagement in our ever-changing world.

Secure Videoconferencing

- Interact with your patients in real-time over a HIPAA-compliant video connection
- Provide access to care for patients with travel limitations
- Maximize efficiency in scheduling for your patients and providers

Secure Text Message

- Provide patients with easy access to videoconferencing through secure text messaging
- Send and receive attachments such as documents, photos, and educational materials
- Create customized message templates to expedite routine secure text messaging
- Maintain regular communication and rapport with your patients

**Secure Videoconferencing and Text Messaging functionality powered by Updox is available for a fee.*
