

WoundExpert can help you incorporate telehealth into your workflow.

The WoundExpert® Patient Portal provides a secure line of communication between you and your patients.

- Conduct virtual visits and follow-up conversations
- Receive images and documents from your patient
- Provide patients with on-demand access to their health information

WoundExpert's Videoconferencing for Telehealth* allows you to initiate and launch a video chat with your patient directly from the WoundExpert application.

- Interact with your patients in real-time over a HIPAA-compliant video connection
- Provide access to care for patients with travel limitations

* The Patient Portal is included with your WoundExpert license. However, videoconferencing is available for a fee.

Not sure where to start?

We've developed a 360 Professional Services Telehealth offering to help guide you in preparing your clinic to administer remote care for your patients. To learn more, contact us at woundexpert@nethealth.com or 800.411.6281.
