

Your all-in-one, cloud-based outpatient EMR and billing therapy solution.

Net Health Therapy for Private Practice gives you everything you need—practice management, scheduling, documentation, billing, productivity tools, MIPS reporting and more—in one software solution to keep your outpatient clinic running smoothly so you can focus on your patients.

All the functionality you need in one modern, cloud-based system.

Practice Management

- Quickly access billing, productivity and operations reports
- Monitor all required authorizations
- Maximize patient engagement with the Patient Portal
- Analyze trends with patient attendance metrics and visit management reports
- Easily track Plan of Care (POC) signatures
- Review corporate and multi-clinic reports

Scheduling

- Interact with patients in real-time using secure Videoconferencing for Telehealth
- Keep on top of changes with easy drag-and-drop capability
- Reduce no shows and cancellations with automated appointment reminder calls, texts or emails (*optional*)
- Create filters to view schedule by therapist, clinical team, discipline, or visit type
- View schedule by day, week or month
- Visualize provider availability based on therapists' scheduling templates
- Easily identify visit specifics with customizable color-coding

Documentation

- Efficiently document treatment from all therapy disciplines - physical therapy (PT), occupational therapy (OT) and speech-language pathology (SLP)
- Meet documentation needs for both adult and pediatric populations
- Adapt easily with an intuitive, familiar SOAP note format designed with therapists' input
- Stay compliant through alerts (i.e. Medicare Therapy Threshold Estimates, Progress Reports and more)
- Customize workflow, questions and forms to meet your practice's specific needs
- Start documenting immediately with built-in templates and organize by body part or skill area
- Take advantage of industry leading functional assessments

Billing

- Prevent ineligible treatment with embedded electronic insurance verification
- Easily reconcile and post payments manually or electronically with line-item detail on remittances
- Streamline your billing process with codes, charges and patient information all in one system
- Improve HCFA (CMS1500) or UB04 (CMS1450) claims accuracy and reduce denials with validation prior to electronic submission to the clearinghouse
- Keep on top of Accounts Receivable with comprehensive financial reports
- Process electronic remittance advice (ERA) postings and electronic or printed patient statements (*optional*)

Ensure your success and fully utilize Net Health Therapy for Private Practice through access to training and support from implementation through on-boarding any new staff:

- Dedicated project manager during implementation
- US-based phone and email support
- 24/7 access to online training at Net Health University, including role-based training, functionality reviews of new releases and best practices for compliant documentation.

Consider these optional integrations to enhance your practice:

Appointment Reminders

Reduce no shows and cancellations with automated appointment reminder calls, texts or emails.

E-faxing Solution

Eliminate paper and save time with built-in e-faxing.

Home Exercise Program (HEP)

Improve patient engagement with easy online personalized home exercise plans.

Revenue Cycle Management (RCM)

Maximize reimbursement and cashflow through our expert billing cycle experts.

Eligibility Verification

Save time verifying patients' eligibility for services from within the system.

Focus on Therapeutic Outcomes (FOTO)

Boost patient satisfaction and promote outcomes to referral sources with access to benchmarks, analysis, compliance and reporting tools.

Merit-based Incentive Payment System (MIPS) / Qualified Clinical Data Registry (QCDR)

Streamline collection and reporting with MIPS / QCDR integration.

Digital Marketing Services (DMS)

Grow your practice with improved online presence and reputation.

Patient Statement Services

Save money by eliminating supplies and labor costs for manually printing and mailing patient statements.

Videoconferencing for Telehealth

Increase access to care for patients with travel limitations - interact with patients in real-time over a secure audio/video connection.

Not sure exactly what your practice needs for success?

Don't worry, we have several plans for you to choose from to fit your needs, your size and your budget. For more information contact us at ReDoc@nethealth.com, 800.411.6281, or visit nethealth.com.
