

Empower your clinic's decisions for better outcomes.

Net Health Business Insights for Employee Health

A web-based dashboard tool designed to deliver at-a-glance Employee Health insights about compliance, patient flow, illness and injury rates, and cost data.

You'll find all the information you need in one dynamic platform. Results can be filtered within seconds, without having to run and compile multiple reports. Reallocate the time you spend running reports and easily and quickly view high-level aggregated data that can help drive actionable decision for your clinic.

Visualize Data in 4 Key Areas

Injuries and Illnesses

Find opportunities to reduce costs by identifying and mitigating injury root causes leading to lost time and money.

Productivity

Staff clinics efficiently to curb employee wait-times.

Compliance

Identify gaps in employee compliance. Stay on track with your compliance goals and identify departments or populations that need attention.

Cost

Monitor year-over-year trends and detect areas of rising cost.
